

CHATSWORTH OMR-1100 TEST STRIP

Print at 100%% / Actual Size - NEVER 'fit to page'.

Cut precisely on the solid outline (width must be 3-1/4").

FEED: this top end goes in FIRST.

Ticks toward the timing sensor (left side),
printed face toward the red glow.

Pattern: walking diagonal, 1 mark per column,
last 2 columns blank. Binary mode I00 returns
2 bytes/column (0x20-0x7F), CR-terminated.

Geometry: ticks 0.125 x 0.060 in, 0.250 in centers,
first tick 0.375 in from leading edge; 12 rows at
0.250 in centerlines from strobe edge.

Spec: [omr1102_techmanual.pdf](#) Appendix A
(docs/recovered/, via [web.archive.org](#))
